

GCI

Manual Cylinder Inverter

The new **GCI** easily inverts and drains cylinders from the short 20 lb. CO₂, SCBA and scuba, to the large standard industrial cylinders like the 100 lb. CO₂.

The 5 selectable pivot points and a cylinder containment arm provide balance and safety to avoid injuries that can occur when employees use makeshift cylinder handling equipment.

The **GCI** is characteristic of all Galiso products: Versatile. Durable. Efficient. Constructed of Heavy-duty 1/4" carbon steel, the frame, platform, and cylinder cradle (coated to protect your cylinders) provide stability and long life service in any hydro shop environment.

The small footprint conserves workspace so the **GCI** can be located near the test station to maximize time and labor savings.

Specifications:

Center Pivot Points for: 30", 33", 51", 54", and 60" tall cylinders

Dimensions: 66" L x 24" W x 60" H

Minimum Cylinder Size: 4" x 30" Tall

Maximum Cylinder Size: 10 5/8" x 60" Tall

Weight: 150 Lbs.

Warranty: 6 Months
